

The diagram illustrates the system architecture of the Intel Sandy Bridge platform. The Intel Processor (Sandy Bridge) is connected to the Intel Cougar Point PCH via the QSB 1440. The PCH is connected to various components including the Integrated Clock, SATA controllers, USB controllers, LAN controllers, and the BIOS. The system also includes a VRD 12 on Board, QSW 1440, ITP, and various slots for PCIe X16, SATA, and USB.
